ALTERNATIVE MATERIALS COLLECTION

# Terrific Textures

Textures like never before, featuring some of the most aggressive in the industry. Deep and dramatic linear grain patterns with registered and indexed texture designs that match the board's grain pattern to a tee. Man-made by the most skilled European masters of the craft, but with an appearance so natural they defy the eye. Stable, durable, fade and darkening resistant Strata TTS Thermally Textured Surfaces have truly taken manufactured textured surfaces to heights never before achieved.

## Complimentary Products

Edgeband

Rolls of matching edgeband in all TTS colors as well as stainless steel.

Moulding

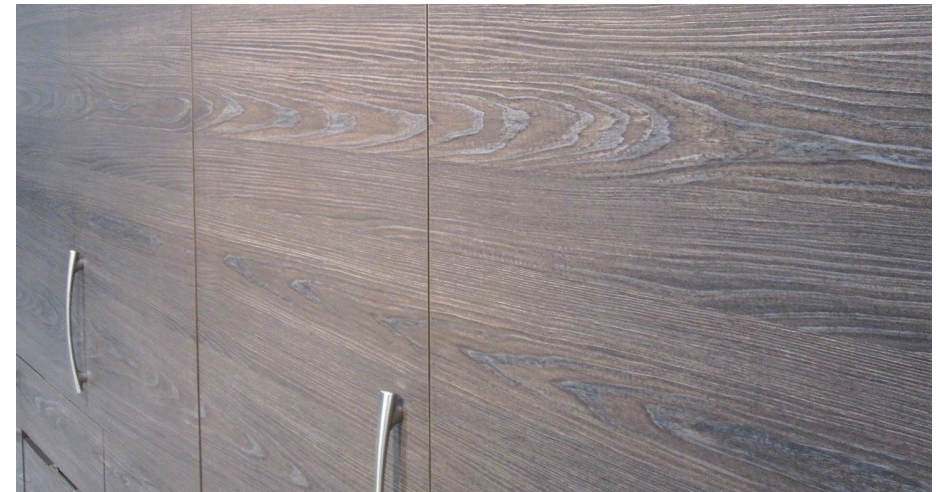

Mouldings available include Scribe, L-Moulding and a Narrow Overlay Filler. Available in most Strata colors, mouldings are the finishing touch for your project.

Range hood

Strata range hood designs provide stylish looks for both contemporary and transitional kitchens. Available in most colors for the perfect kitchen focal point.

## Sequential Grain Matching

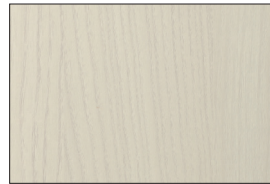

Sequential Grain Match available in Slab design. Vertical or horizontal (shown) grain orientation is available.

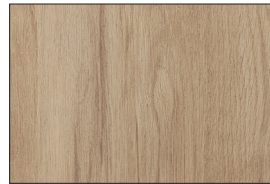

Discover what's in Vogue in the world of wood alternative materials. Vogue Thermally Textured Surfaces (TTS) are similar in general appearance to the Strata program but with a less aggressive embossed texture and is offered at a more sensitive price point. The Vogue palette includes four distinctive, gorgeous colors and features an antibacterial surface, making it the perfect material for kitchens, baths, school environments, medical offices and more.

# Alluring Veneers

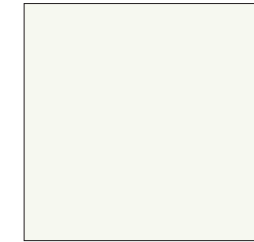

The Allure DLV Collection of doors, drawers, and accessories have taken full advantage of lamination and embossing technology to captivate the eye with 25 door designs in three texture ranges – from satin smooth, to subtle patterns, to dramatic registered & indexed creations. Select from a spectrum of colors, including solids and glazed options. Allure DLV is exceptionally durable, dimensionally stable, and colorfast. And many selections are treated with a lifetime antimicrobial agent. All this at a price point 35% to 55% below comparable finished wood products.

Our MDF (Medium Density Fiberboard) is precision engineered and fabricated to go where traditional wood products best not tread. For those environments where moisture and humidity are a concern, the dimensional stability of our MDF defies these elements to resist the expansion and contraction that can often affect the integrity of wood. And in addition to the stable composition, the surface preparation of our 1-Piece and 5-Piece MDF and MDF Hybrid products make for the perfect palette for the most consistent and aesthetically appealing painted finishes.

# Stability Defined

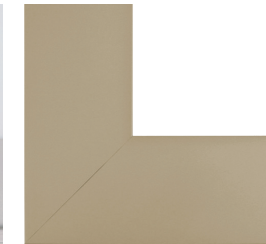

When a clean, contemporary Euro feel is the order of the day, let Conestoga's Aluminum Accent Door Collection shine the light...with choices aplenty! Whether it's the subtlety of a natural aluminum finish or the sleek modern look of brushed stainless steel – in combination with tempered glass, backpainted glass or Parapan® panel options – you can let your true contemporary design expression shine through...even perfectly matching your appliance selections. And why not push your creativity further with a framing selection that includes Black, Brushed Stainless Steel, Natural Aluminum, Oil Rubbed Bronze, White, Chrome, and Arctic Gold finishes... paired with an assortment of complementary knobs and pulls, of course.

## PARAPAN®

Parapan® inserts are ideal paired with Aluminum Frame Doors for a host of rooms. In your home kitchen and bath or hospitality and medical applications this smooth, non-porous acrylic material is colorfast and UV-resistant. Whether you are filling a room or using the glossy finish for a focal point in a room, selecting which color option for your design may be the most difficult decision.

## Backpainted Glass

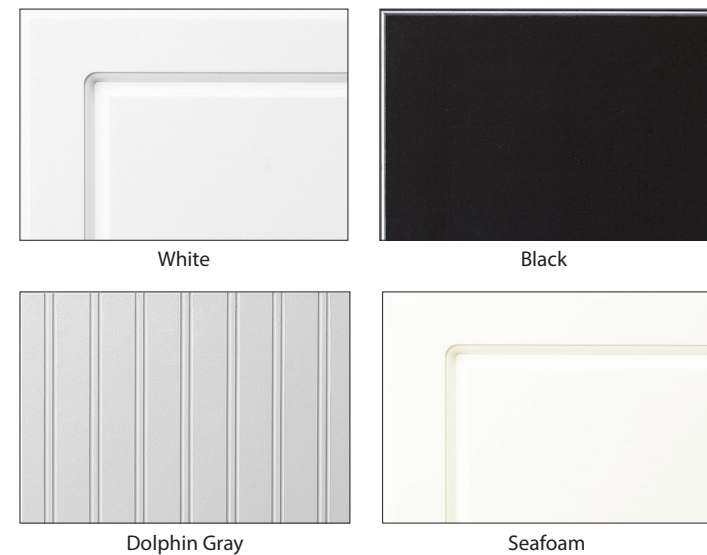

Backpainted glass is tempered, low-iron glass that provides brightness and color fidelity when utilized in your design. Providing a unique and modern element to your home, backpainted glass inserts are non-porous which help cut down on germs and bacteria, while being easy to clean. Available in multiple colors, each is offered in high gloss or a matte sheen.

# Power of Poly

The ultimate in durability and lasting beauty for those who make the great outdoors a part of their everyday living. Whether it be poolside, seaside, or boating on the high seas, our marine-grade polymer material endures the perfect storm of the beating sun, the pounding rain, and most any other punishment Mother Nature chooses to dish out without yellowing, color fading, or staining.

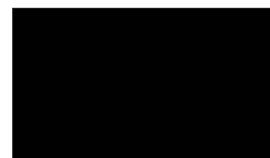

## Doors Styles and Colors

Brilliant glassy-gloss looks to appeal to lovers of the sleek, the contemporary, and the highly durable. The Synchronicity High Gloss Program includes PET and UV Lacquer options, both of which shine at a gloss level of 90%. And PET-G, our innovative glass-like European material achieves an astonishing 95% gloss level. But no matter the gloss level desired, Synchronicity offers gloss appeal that's highly scratch, heat, chemical and UV resistant to enable this collection to shine on and on and on. Here are a few finishing options.
